

Marine Environmental Monitoring Systems (MEMS)

Bespoke marine environmental monitoring systems and installations worldwide

Advice, training & mentoring

System installation

Site surveys, GNSS levelling & calibration

Smart telemetry equipment

System design & integration

Servicing & maintenance

Data platform: acquisition, storage & display

KEY BENEFITS

- Trusted and experienced marine engineers
- Bespoke systems, tailor made to your requirements
- Quality and reliability assured
- End to end service
- Pick and choose the service and system that is right for you

Using our team of experienced field engineers, we offer a bespoke service and can design, install and maintain your sensors and monitoring equipment no matter what the size or scale of your operations.

We will ensure that you have the right sensors and system for your requirements.

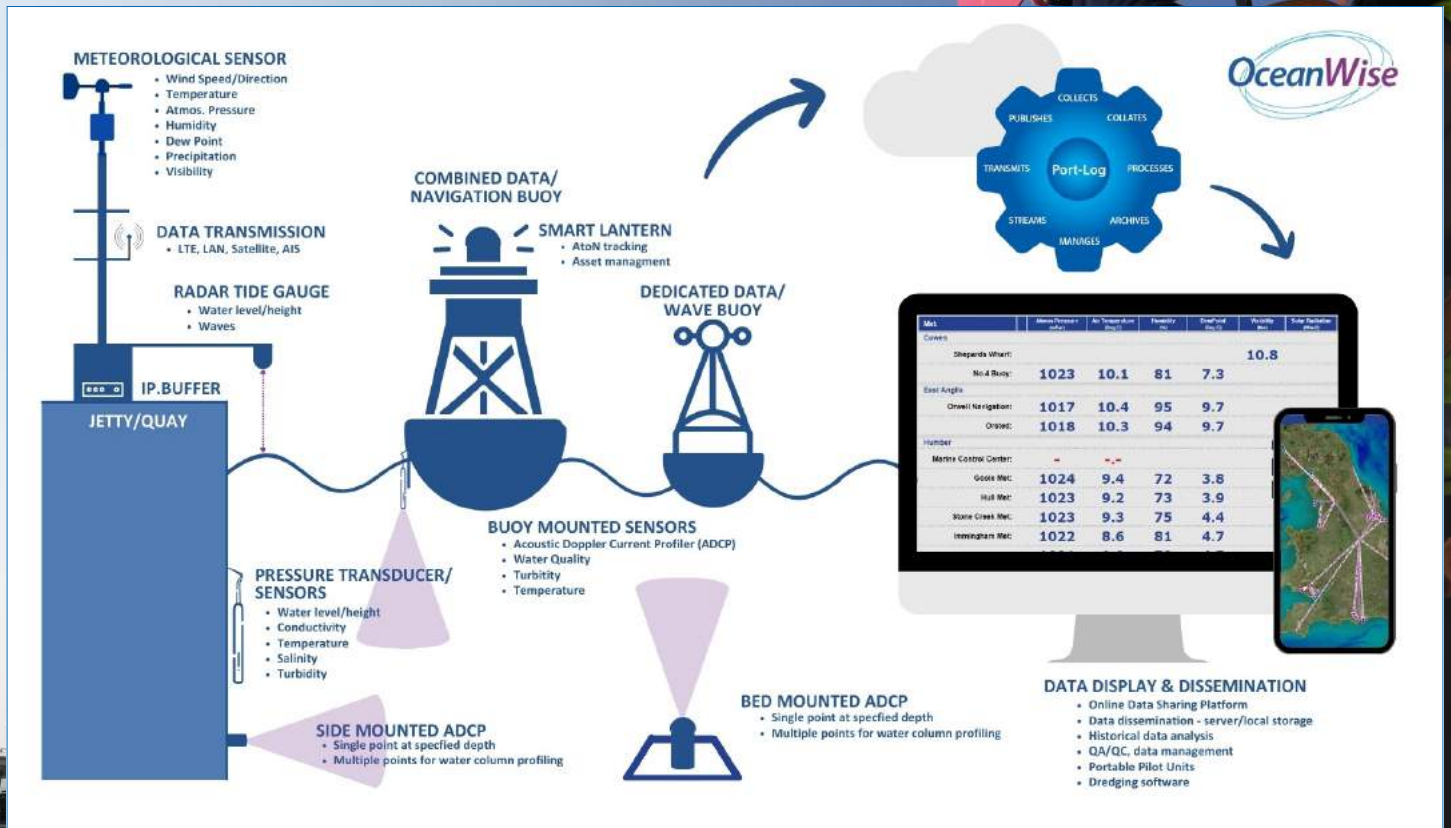

We have installed and integrated MEMs all over the world and pride ourselves on being trusted, flexible and independent.

We undertake:

- Site Surveys
- Factory Acceptance Tests / Commissioning / User Acceptance Tests
- Geodetic Levelling and Surveys
- Installations (Sensors, Systems and related equipment)
- Servicing and Maintenance
- Calibration / Recalibration
- Flexible, robust service from trusted marine engineers

We can help advise at any stage of your project and offer a FREE initial consultation and advice. Simply contact us.

Bespoke Marine Environmental Monitoring Systems

Protect your investment in your marine assets and keep them delivering the data you need when you need it
