

# Port-Log Observer

Environmental Monitoring: Data as a service

## KEY BENEFITS

- Real-time reliable data delivered as a service
- Hassle free installation, servicing and maintenance
- Affordable with no large up-front investment required
- Intuitive data platform accessible from any smart device

**Port-Log Observer** is a hassle-free solution that delivers reliable marine environmental data as a service. It provides all the advantages of real-time tide and weather monitoring without the significant up-front investment or complexities of installation.

We will install, maintain and service the sensors delivering real-time, location specific information. With **Port-Log Observer**, you receive dependable, detailed, and actionable data to support informed decision-making and operational safety. There are three simple options to choose from: **Tide**, **Weather**, or a combined **Tide & Weather package**.

Talk to one of our team today about the best solution for your needs, or request a quote via [info@oceanwise-global.com](mailto:info@oceanwise-global.com) or 01420 768262.

*“Provision of accurate tide and weather data underpins our services not only to commercial traffic but also to UK leisure sailors as well. OceanWise ensures we are able to continue to do that long into the future.”*

*William Heaps - Technical Authority*
